Return to Program Policy

Effective January 17, 2023, Standard College has implemented a new Return to Program policy.

Standard College is committed to ensuring clear guidelines to former students who seek to return to the Practical Nursing or LPN to RN Transition program. The former student who is interested in returning to a Standard College nursing program must comply with the required steps contained in this policy. The former student must complete and submit the online Return to Program application, take and pass a Placement Exam, make the appropriate tuition payment, and resubmit the Health Requirement forms and Criminal Background Check and Drug Test, in order to return to the program.

Space Availability

Reenrollment will be based upon space availability. The former student may need to wait for an unspecified period of time for a spot to become available in the course he/she is scheduled to join, after completing the required steps contained in this policy.
